Objectives and achievements of the IMPRODOVA project

Prof. Dr. Joachim Kersten
DHPol Deutsche Hochschule der Polizei / German Police University
June 9th, 2021, online
IMPRODOVA project

= Improving frontline responses to high-impact domestic violence

Goals:

• Improve **interagency cooperation** among HIDV frontline responders

• Develop and test tools for this aim

• Integrate **human factors** in FLR’s perception of and intervention in HIDV cases
Domestic violence means

• „... all acts of physical, sexual, psychological or economic violence that occur within the family or domestic unit or between former or current spouses or partners, whether or not the perpetrator shares or has shared the same residence with the victim ...“ (Istanbul Convention)

• Not a family dispute!
• Perpetrator motives: power and control
Every day 8 women or more are killed by their (ex-)partner or family in Europe.

Where we share our tools & findings

Welcome to the international site of the training platform of the EU project IMPRODOVA.

IMPRODOVA is a research and innovation project concerning human factors shaping responses to domestic violence, a behavior causing physical, sexual or psychological harm, including physical aggression, sexual coercion, psychological abuse and controlling behavior. IMPRODOVA's operational definition of high impact domestic violence (HIDV) is serious violence within the family, against children, spouses and elderly family members. Seriousness can be intensity, duration and consequences of violence. Further information and how to contact us can be found here.

Find more information here: IMPRODOVA Flyer.

Improdova partners

16 partners from 8 EU member states:

- Incl. 5 police universities/colleges
- 6 police organizations,
- Medical science faculty,
- Independent/national research,
- Public health,
- NGO

- Coordinated by DHPol (Münster, GER)
